DATE:)		

FOR: WATER FEEDER CONTROLLER FOR BOILER

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In accordance with 37 C.F.R. 1.56, 1.97 and 1.98, the following item is made of record to assist the Patent & Trademark Office in its examination of this application. Applicants identify a Cycle Control System for Boiler and Associated Burner as a device that was on sale or in public use one year before the filing of the present invention. This device is best described in U.S. Patent No. 6,390,027 (the " '027 patent"), which has been made of record by the Examiner in a June 17, 2004 office action. In response to this office action, applicants have argued that the '027 patent itself cannot be prior art under 35 U.S.C. § 102(b) against the present invention, and further that the device described by the '027 patent is not material to, nor does it anticipate, the present invention. Although the device described by the '027 patent is deemed immaterial to the present invention, applicants identify this device for the record to ensure completeness with all disclosure obligations.

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or that no other art than that identified exists.

PATENT NO.
6,390,027

INVENTOR
Lyons, et al.

ISSUE DATE
May 21, 2002

A copy of the foregoing item and Form PTO 1449 are enclosed herewith.

Respectfully submitted,

Robert Curcio
Reg. No. 44,638
